## Hundreds Witness Albany's Greatest July 4th Parade

Thousands of spectators jammed Solano and San Pablo Aves. Monday to witness the largest and most colorful Independence Day parade in the history of Albany.

The all-day celebration at Memorial Park attracted a capacity crowd, which was highlighted with a band concert, baseball games, folk dancing, bathing beauty contest for youngsters, and climaxing with the Mayor's Ball that evening.

Some 40 young ladies participated in the junior bathing beauty contest sponsored by the Albany Lions Club, with little Cheri Buchel winning the first place trophy. Second and third place awards went to Betty Ann Ruhl and Kitty Bissett.

The shooting of "illegal" fireworks was heard around the clock from throughout the city, but no major accidents or fires were reported.

## Fireman Freddy Says

A cigarette keeps burning after it is tossed away because, after exhaustive tests by the State Fire Marshal Laboratories, it was found that most cigarette papers are treated with precipitate chalk. This makes the paper more porous, thus letting in more oxygen and creating a kind of natural draft which keeps the cigarette burning to the very end.

## CARTER RE-NAMED ALBANY ENGINEER

### McLaughlin 'Quits' Post

Howard B. Carter today is back in his former post as Albany City Engineer after a two-year leave from the city.

He was named for the position by unanimous vote of the Albany City Council Tuesday night to fill the vacancy created through the resignation of City Engineer Howard N. McLaughlin.

McLaughlin's resignation was tendered June 30 at the request of the Council, which, according to Mayor Lewis Howell, voted unanimously in a special session called to discuss the matter.

McLaughlin was hired in May, 1953, to fill the post vacated by former City Engineer A. L. Brinkman, who succeeded Carter in August, 1952.

An engineer with the State Division of Highways for 30 years, McLaughlin said he planned to retire to his ranch in St. Helena and possibly go into private business. He said, "I think everyone in Albany understands the situation," and termed the City Engineer position as "an annual type of employment."

Carter, who was re-hired by the Council at a salary of \$700 per month plus a \$45 car allowance, was first employed by the city in July 1950. He served until August 15, 1952, when he resigned to do private consultant work on special highway projects in Del Norte County. Carter served for 22 years as City Engineer for the City of Santa Monica before coming to Albany in 1950.

In other action, the Council took under consideration a suggestion of Mayor Howell to ban electioneering sound trucks from the streets of Albany.

Discussion on the restriction was sparked after the Winton McKibben Campaign Committee requested a hearing in an effort to retrieve a \$15 business license tax paid for permission to operate a sound truck.

Councilman Jerome Blank said he thought the business license tax for election sound trucks was "infringing on the freedom of speech." Other Councilmen held that the trucks should not be allowed to broadcast in the residential districts or on Sunday.

The Council called a hearing on August 2 to discuss the campaign committee's request.

In other business, the Council accepted with regret the resignation of Ernest C. Blow, member of the Planning Commission for the past 18 years.

## Eagle Auxiliary Head Appoints Committees

Mesdames Vivian Hedge, Charlotte Kurtz, and Odette Accuriso, finance committee; Ida Raymond, Rubel Johansen and Anette Holland, sick committee, and Ida Raymond, Martha Vadnais, Nora Orm, Gertrude Hart, Ellen Coughlin and Florence Zack, refreshment committee for July.

ROTARY CHIEF—Harold G. Denham, left, retiring president of Albany Rotary Club, presents to George Irwin, incoming president, the manual of rules and regulations as guide for the coming year. Officers serving with Irwin are Dr. Robert Bacigalupi, secretary; Charles Roberts, treasurer, and Bill McAuley, Bert Griffin, Elmer Coble, Robert Foley, Harold Olson and Ray Warne, directors.

## Albany Man to Head Oakland Building Dept.

Lawrence A. Lane, of 939 Evelyn Ave. today has been appointed head of the Oakland building department, it was announced by Oakland City Manager John F. Hassler.

Lane, who has been with the City of Oakland since 1941, replaces Milton T. Kitchell who retired May 1.

Lane joined the city January 2, 1941, as a draftsman in the engineering department. He was appointed structural engineer on July 1, 1948, and was reclassified as a civil engineer on June 7, 1950.

He received a bachelor of science degree in civil engineering from the University of California in 1938 and took additional courses in the University Extension in structural engineering, earthquake resistant design and soil mechanics.

Lane is a member of the San Francisco section of the American Society of Civil Engineers, and is a charter member of the Eastbay Structural Engineers Society.

PICTURED before departing for their honeymoon up north are justweds Mr. and Mrs. Arthur B. McIntyre Jr. (Virginia Cake Merrell), who recited their vows at the Chapel of the Church of the Redeemer. A reception followed the early afternoon ceremony at the home of the bride's parents, Mr. and Mrs. George F. Cake, 240 Willamette Ave. The benedict is the son of the senior Arthur B. McIntyre of 3 Kenyon Ave., Berkeley. The couple will make their home in Albany where the groom is assistant health officer.—Courtesy Gazette.

**RECEDING HAIRLINES**  
By Science Features

There's no use losing any sleep worrying about losing your hair—for so far there is nothing that can be done about getting bald. Whether or not people lose their hair is determined primarily by their genes and not by their own effort.

The most frequent type of baldness is inherited from parents and — like almost everything else — is influenced by sex; men are much more affected than women. Baldness may also develop from inadequate care of the scalp or as a result of serious infections such as pneumonia or influenza. Frequently, in these cases, the hair returns when health becomes normal.

Gray hairs are not symptomatic of baldness but merely lack the special pigment for hair coloration. Most men lose about 50 hairs a day, but, as the typical head contains 100,000 strands, it does not make much difference — if the healthy scalp produces replacements.

The first chemical clue to the cause of baldness was recently discovered at the University of Pennsylvania Medical School. Scientists found that sebum, an oily substance secreted by the scalp, contains hair-killing compounds. It was previously regarded as an agent that only lubricated the scalp. The body's sex hormones are said to regulate the amount and quality of sebum produced.

Experiments are under way to determine what substances explain why hair grows in most cases and what can be done to prevent thinning in others. A prescription for preventing baldness may be a long way off but medical researchers feel that progress is being made.

## Trend-setting styling

Ford's trend-setting styling has set the pace for the industry. It is forward-looking styling that's out front today and will stay attractive for the years ahead, too.

## Highest resale value

An analysis of used car sales statistics shows that recent-model Ford cars return a greater portion of their original cost than any competitive make of car.
